About

Since I was young I was fascinated with simultaneously useful and glamorous things. I tried to match both practical and aesthetic side of that at the same time.

After high school I decided to go in a direction where I could create something useful and breathtaking and at the same time. I chose a course at AkademiaUXUI, where I discovered that I have potential.

This is how I found myself in the UXUI world. I learned the secrets of design to give unique value to my clients and as always I ask them lots of questions to find their real problems.

I want to continue to develop myself, discover new industries and take on new challenges to design even greater.

Education

ZSTI in Mszana Dolna

Sep 2017 – May 2021
